4. ACCOUNTING TREATMENTS METHOD AND THE MEASUREMENT OF PERFORMANCE IMPACT

A. Accounting treatment method

(1) Date of Grant

Since Share Options cannot be exercised on the Date of Grant, no related accounting treatment is required. The Company will use the Black-Scholes Model on the Date of Grant to determine the fair value of Share Options on the Date of Grant.

(2) Vesting Period

On each balance sheet date within the Vesting Period, the Company shall recognize the relevant assets costs or current expenses for the services acquired during such period and shall be recognized under “Capital Reserve – Other Capital Reserve” at the fair value of the Share Options on the Date of Grant based on the best estimate of the number of exercisable Share Options.

(3) Accounting treatment after the Exercise Date

No adjustment shall be made to the confirmed costs and total owner’s equity.

(4) Exercise Date

If the Exercise Conditions are met on the Exercise Date, the Share Options can be exercised and carried forward to the “Capital Reserve – Other Capital Reserve” recognized on each balance sheet date before the Exercise Date; if all or part of the Share Options become invalid or are abolished due to failure to exercise, it shall be treated in accordance with accounting standards and related regulations.

(5) Fair value and determination of the Share Options

In accordance with the relevant requirements of the Accounting Standards for Business Enterprises No. 11-Share-based Payments (《企業會計準則第11號 – 股份支付》) and the Accounting Standards for Business Enterprises No. 22 – Recognition and Measurement of Financial Instruments (《企業會計準則第22號 – 金融工具確認和計量》), the Company uses the Black-Scholes model (BS model) as the pricing model, and the Company uses this model to make an estimation on the fair value of the Share Options granted based on 17 August 2021 (official calculation will be conducted at the time of Grant). The specific parameters are selected as follows:

- (i) Price of target shares: RMB42.89 per share (closing price on 17 August 2021)

- (ii) Validity Period: 1 year, 2 years, 3 years, 4 years and 5years, respectively (period commencing from Date of Grant and ending on the first date of exercise for each respective period)
- (iii) Historic volatility: 14.73%, 17.44%, 18.71%, 17.92% and 16.55% (annualized volatility for the corresponding period of SSE Composite Index)
- (iv) Risk-free interest rate: 1.50%, 2.10% and 2.75% (based on one-year, two-year, three-year, three-year and above RMB deposit benchmark interest rate, respectively, of financial institutes developed by the People's Bank of China)

B. Expected impact of the implementation of Share Options on operating performance in each period

The Company granted 5,353,072 Share Options to the Participants for the First Grant of Share Options. The fair value of the Share Options on the date of Grant was estimated based on the projected fair value of Share Options on the date of Grant which is calculated according to the closing data of the trading day prior to the publication of the draft. The total fair value of the equity instruments granted this time is estimated to be RMB60,332,200 thousand. The total fair value as the Company's incentive cost of the Scheme will be recognized in stages during the implementation of the Scheme in accordance with the exercise percentage, and will be charged to the recurring profit or loss. According to the requirements of the accounting standards, the specific amount shall be subject to the fair value of the Shares calculated on the actual Date of Grant. Assuming that the Company grants Share Options in August 2021, where all the granted Participants meet the Exercise Conditions specified in the Scheme and have exercised during respective Exercise Periods, the amortization of Share Options costs from 2021 to 2026 is as follows:

Unit: 10'000

Amortized costs of the Share Options	2021	2022	2023	2024	2025	2026
6,033.22	826.72	2,180.92	1,405.03	910.43	517.12	193.00

Notes:

1. The above costs are projected costs related to the Grant Price, Grant Date, closing price on Grant Date, number of grants and estimate of the largest number of exercisable equity instruments;
2. Shareholders are reminded to be aware of the possible dilutive effect of the above-mentioned share-based payments;
3. The final impact of the above amortization costs projections on the Company's operating results is subject to the audit report issued by the accountant;
4. Any difference in the mantissa of the sum of the totals and the breakdown in the table above, if any, is due to rounding.

The costs of the Scheme shall be charged to the costs and expenses. Based on the current information, the Company estimates that without considering the positive effect of the Scheme on the Company's performance, the amortization of the costs of the Scheme will have an impact on the net profit each year within the Validity Period, but the impact is not significant. Taking into account the positive effect of the Scheme on the Company's operation and development, which stimulates the enthusiasm of management and business teams, improves operating efficiency, and reduces operating costs, the performance improvement of the Company brought by the Scheme will be higher than the increase in costs caused by it.

5. IMPLICATIONS UNDER THE LISTING RULES

The A Share Option Incentive Scheme constitutes a share option scheme under Chapter 17 of the Listing Rules. Pursuant to the requirements of Rule 14A.92(3)(a) of the Listing Rules, issue of new securities to connected persons of the Company is fully exempted from the requirements of approval by Shareholders, annual review, announcement and circular under Chapter 14A of the Listing Rules. Directors who are the proposed Participants under the proposed A Share Option Incentive Scheme have abstained from voting on the proposed A Share Option Incentive Scheme and/or the proposed Grant to themselves.

6. WAIVERS FROM STRICT COMPLIANCE WITH THE LISTING RULES

As the Scheme involves the issuance of new A Shares by the Company, Chapter 17 and certain provisions under the Listing Rules are therefore applicable to the Scheme, and the relevant PRC laws and regulations relating to the establishment of the Scheme and the Grant of Share Options are also applicable. Therefore, the Company has complied with the requirements of the relevant PRC laws and regulations as well as the Listing Rules as far as possible when preparing the terms of the Scheme, and will apply to the Hong Kong Stock Exchange for certain waivers from strict compliance with the requirements for Exercise Price and its adjustment under the Rule 17.03 of the Listing Rules.

(1) Waiver from strict compliance with Note (1) to Rule 17.03(9) of the Listing Rules regarding the basis of determination of the Exercise Price

Note (1) to Rule 17.03(9) of the Listing Rules requires that the exercise price of relevant share options must be at least the higher of (i) the closing price of the securities on the date of granting the options; and (ii) the average closing price of the securities for the five business days immediately preceding the date of granting the options. However, the relevant PRC laws and regulations require that the exercise price of A Share Option Incentive Scheme shall be the highest of: (i) the average trading price of the A Shares on the trading day immediately preceding the date of announcement of the A Share Option Incentive Scheme; and (ii) one of the average trading price of the A Shares for the 20/60/120 trading days immediately preceding the date of announcement of the A Share Option Incentive Scheme.

Since the Share Options proposed to be granted under the Scheme involve A Shares only, and the Exercise Price must be determined based on the relevant PRC laws and regulations, the Company will apply to the Hong Kong Stock Exchange for a waiver from strict compliance with Note (1) to Rule 17.03(9) of the Listing Rules in respect of the Exercise Price of the Share Options proposed to be granted under the Scheme.

For details of the Exercise Price and the basis of determination, see the section headed “Proposed Grant Under the A Share Option Incentive Scheme—Exercise Price and basis of determination” in this announcement.

(2) *Waiver from strict compliance with Rule 17.03(13) of the Listing Rules regarding the adjustment of Exercise Price in the event of dividend distribution*

Rule 17.03(13) of the Listing Rules required the scheme document must include a provision for adjustment of the exercise price or the number of securities subject to options already granted and to the scheme in the event of capitalization issue, rights issue, sub-division or consolidation of shares or reduction of capital.

On the basis of the following factors, the Company will apply to the Hong Kong Stock Exchange for a waiver from strict compliance with Rule 17.03(13) of the Listing Rules regarding the adjustment of Exercise Price in the event of dividend distribution: (i) the proposed terms of the Scheme, including the provision of adjustment of Exercise Price in the event of dividend distribution, are prepared in accordance with the relevant requirements under the PRC laws and regulations and the requirements of the relevant regulatory authorities in the PRC; (ii) the number of A Share Options proposed to be granted under the Scheme is 5,947,858, representing approximately 0.28% of the total issued share capital of the Company and approximately 0.35% of the total issued A Share capital of the Company as at the date of announcement of the draft Scheme. The dilutive impact of the Scheme is minimal. Further, according to the relevant PRC laws and regulations, the issue price of the Shares shall not be below the nominal value of the Shares and therefore, the A Shares shall not be issued at less than its nominal value of RMB0.25 per A Share pursuant to the exercise of the Share Options; and (iii) the A Shares, being the underlying Shares of the Share Options, have been trading at a premium over the H Shares. Taking into account the deviation in the trading prices of the A Shares and H Shares, the dilutive impact on the H Share Shareholders as a result of issue of new A Shares pursuant to the exercise of Share Options is negligible, the adjusted Exercise Price of the Share Options in the event of dividend distribution is expected to remain higher than the then prevailing trading price of the H Shares.

For details of the adjustment of Exercise Price in the event of dividend distribution, see the section headed “Proposed Adoption of the A Share Option Incentive Scheme—Methods of and procedures for adjustment of the Scheme” in this announcement.

7. THE SHAREHOLDERS’ GENERAL MEETING

The Scheme is proposed to be considered by Shareholders at the Shareholders’ general meeting. The Company will deliver a circular to Shareholders in due course, stating the terms of the Scheme and the details of the proposed Grant.
